

Graduate Student Support Plan (GSSP) Health Insurance Coverage (NCSU RA-TA) Queries

Query System: SIS Reporting

Query Name: **GSSP_INS_SUMMERPREPAYS**

What does this query retrieve?

This query returns GSSP students flagged for summer health insurance coverage prepayment (May 16 – August 15). When the GSSP summer health insurance prepayment list was generated, the students found in this query were determined to be GSSP qualifying Spring 2015 graduate teaching assistants (A138s) *only*, with no concurrent or continuing GSSP qualifying appointment (RA, RA-TA, or primary fellowship), that were *not* graduating in the May 2015.

When can I run this query?

This query can be run by the beginning of May each year. The Graduate School will include an announcement in the April DGP/GSC updates indicating when this query will be ready for departments to run.

What should I enter for the prompts?

Before this query will return results, you will be prompted to enter certain criteria.

“Current Spring Term:” = Enter the current term number. Example: Spring 2015 = 2151

An example of the prompt criteria for Spring 2015 coverage is below:

What if a student does not appear in the query results?

If a student does not appear in the query results, it is presumably because the student did not qualify for summer GSSP health insurance prepayment. This could be because the student had another concurrent or continuing GSSP qualifying graduate appointment or because they were graduating at the end of spring semester and not returning in fall to continue in another GSSP qualifying degree plan.
