Quick Guide to Reader Application Dashboard

- Indicates the current bin.
- This field will populate if the applicant is part of a unique group such as scholarship groups/programs.

If your program has a set sub-plan, or if you have supplemental application/questions and ask applicants to provide an interest area, it will show here. If not, this field will be blank.

If this field is blank, it is because: 1. your department does not ask this question, or 2. your department asks the question as part of the supplemental application, which can be viewed in the “Supplemental Application” section of the application.

“School 1” will always be an undergraduate degree and “School 2” will always be a graduate level degree, if one exists.

Test scores will only populate in these fields if they are validated. The applicant’s self-reported scores can be found under the “Test Scores” section of the application.
