III. New Business

a. Graduate Handbook revision to add average time to certificate completion (presented by Dean Peter Harries)
There has been a reexamination of gainful employment at the federal level to reconsider certificate programs for student employment. The Graduate School needs to officially document a time limit for a certificate to define federal financial aid associated with certificate programs. Data was pulled for certificate-only students, and it was an average of 1 and ½ year enrollment for students in certificates. Therefore, Dean Harries is proposing to edit the existing wording in the Graduate School Handbook 3.13: “In most cases, certificate students are not eligible for financial aid, although some students in teaching certificate programs may be eligible (contact the Financial Aid Office for specific eligibility requirements).” to “Certificate students may be eligible for federal financial aid. The average completion time for certificates is two years from initiation, therefore this aid would only be available for the first two years of enrollment in the certificate.” A motion was made to approve the changes. The motion was passed and the item was approved.
