November 4

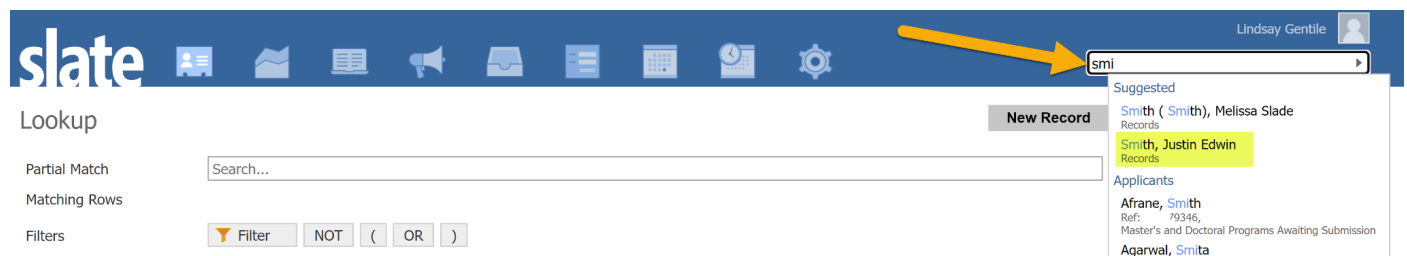

- Deadline to apply to graduate in the fall 2022 term
- Registration required ETD review deadline - date by which a thesis or dissertation student must submit the ETD for review to graduate at the end of the fall

Slate Upgrade

Slate will be unavailable for a few hours on Thursday, Oct. 6th beginning at 4:00 PM, while we reload user security permissions. The changes should be fairly seamless for users and will provide the benefit of increased speed when reviewing applications within the Reader and also while searching for records in Slate.

What you need to know:

- 1) Searching in Slate should only be done by using the global search bar in the top right corner. When you see the record you want, click on it from the drop-down menu (do not hit enter). You should experience a much faster searching experience when following this method:

- 2) If you have queries and/or mailings for prospective applicants (not applicants or admits), you may need to update your filters and/or exports if you are using the population for your program. Example: 'prog_MBA' is a population for the MBA program and prior to this update, applicants and prospects both had the prog_MBA population assigned. With this update, prospects will now get the 'prog_MBA_P' population. While you may need to update some of your queries and mailings with the new population, you will no longer 'lose' prospects who apply to another graduate program.

- 3) When you login on Friday, 10/7, you will notice that the Reader workflow will no longer be labeled as 'Departmental Reader', it will now show 'Applications':

Slate Reader

Should you have any questions or issues after the upgrade, please contact Lindsay Gentile (lwgentil@ncsu.edu).
